### ELECTION/RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to a transmission system for controlling the transmission of a multiplexed signal via a path. This is classified in class 370, subclass 522.
  - II. Claims 10-14, drawn to an optical communication system for transmission of WDM signals from a WDM sending means to a WDM receiving means. This is classified in class 398, subclass 82.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because invention I is related to a transmission system for controlling the transmission of a multiplexed signal via a path, wherein the transmission system is comprised of a sending apparatus that includes signal dividing means, guarantee information adding means, signal sending means, and a receiving apparatus that includes a signal receiving means and signal storing means. Invention II is related to an optical communication system for controlling the transmission of a WDM signal, wherein the system is comprised of a sending apparatus that includes signal dividing means, guarantee information adding means, WDM signal sending means of optical signals of different wavelengths, and a receiving apparatus that includes a WDM signal receiving means for receiving the optical signals and restoring means. Inventions I and II are different because invention I does not have a WDM signal sending means for sending

optical signals of different wavelengths and wavelength multiplexing of optical signals and a WDM optical signal receiving means for receiving the multiplexed optical signals.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
